Re: Benning Facility Consent Decree (Civil Action No. 1:15-cv-018450) - Quarterly Status Report for April – June 2025

Dear Ms. Hopkins,

In accordance with Paragraph 68 of the Benning Facility Consent Decree, please find attached the following reports for the period of April - June 2025:

1. Copies of quarterly discharge monitoring reports
2. Status of annual inspection of the drainage system
3. Storm drain inlets inspection logs
4. Monthly site-wide inspections
5. Status of Stormwater Treatment System
6. Stormwater management training
7. Stormwater pollution prevention plan updates
8. Change in management responsibilities
9. Status of transformer storage shed
10. Status of Stormwater Retention Project
11. Description of non-compliance with effluent limits

The certification statement is also attached. Please contact me at 703.713.5954 or michael.ratcliffe@aecom.com if have any questions or need additional information.

Sincerely,

Michael Ratcliffe
Environmental Program Manager

CERTIFICATION STATEMENT

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I have no personal knowledge that the information submitted is other than true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Amber Young
Vice President, Technical Services

Paragraph 68.a.(1) of the Consent Decree

Discharge Monitoring Reports

Copies of DMRs for the Second Quarter 2025 are attached.

DMR Copy of Record

Form Approved OMB No. 2040-0004 expires on 07/31/2026

EPA may make all the information submitted through this form (including all attachments) available to the public without further notice to you. Do not use this online form to submit personal information (e.g., non-business cell phone number or non-business email address), confidential business information (CBI), or if you intend to assert a CBI claim on any of the submitted information. Pursuant to 40 CFR 2.203(a), EPA is providing you with notice that all CBI claims must be asserted at the time of submission. EPA cannot accommodate a late CBI claim to cover previously submitted information because efforts to protect the information are not administratively practicable since it may already be disclosed to the public. Although we do not foresee a need for persons to assert a claim of CBI based on the types of information requested in this form, if persons wish to assert a CBI claim we direct submitters to contact the [NPDES eReporting Help Desk](#) for further guidance. Please note that EPA may contact you after you submit this report for more information.

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2040-0004). Responses to this collection of information are mandatory in accordance with this permit and EPA NPDES regulations 40 CFR 122.41(l)(4)(i). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information are estimated to average 2 hours per outfall. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

EPA may make all the information submitted through this form (including all attachments) available to the public without further notice to you. Do not use this online form to submit personal information (e.g., non-business cell phone number or non-business email address), confidential business information (CBI), or if you intend to assert a CBI claim on any of the submitted information. Pursuant to 40 CFR 2.203(a), EPA is providing you with notice that all CBI claims must be asserted at the time of submission. EPA cannot accommodate a late CBI claim to cover previously submitted information because efforts to protect the information are not administratively practicable since it may already be disclosed to the public. Although we do not foresee a need for persons to assert a claim of CBI based on the types of information requested in this form, if persons wish to assert a CBI claim we direct submitters to contact the [NPDES eReporting Help Desk](#) for further guidance. Please note that EPA may contact you after you submit this report for more information.

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2040-0004). Responses to this collection of information are mandatory in accordance with this permit and EPA NPDES regulations 40 CFR 122.41(l)(4)(i). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information are estimated to average 2 hours per outfall. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

EPA may make all the information submitted through this form (including all attachments) available to the public without further notice to you. Do not use this online form to submit personal information (e.g., non-business cell phone number or non-business email address), confidential business information (CBI), or if you intend to assert a CBI claim on any of the submitted information. Pursuant to 40 CFR 2.203(a), EPA is providing you with notice that all CBI claims must be asserted at the time of submission. EPA cannot accommodate a late CBI claim to cover previously submitted information because efforts to protect the information are not administratively practicable since it may already be disclosed to the public. Although we do not foresee a need for persons to assert a claim of CBI based on the types of information requested in this form, if persons wish to assert a CBI claim we direct submitters to contact the [NPDES eReporting Help Desk](#) for further guidance. Please note that EPA may contact you after you submit this report for more information.

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2040-0004). Responses to this collection of information are mandatory in accordance with this permit and EPA NPDES regulations 40 CFR 122.41(l)(4)(i). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information are estimated to average 2 hours per outfall. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

EPA may make all the information submitted through this form (including all attachments) available to the public without further notice to you. Do not use this online form to submit personal information (e.g., non-business cell phone number or non-business email address), confidential business information (CBI), or if you intend to assert a CBI claim on any of the submitted information. Pursuant to 40 CFR 2.203(a), EPA is providing you with notice that all CBI claims must be asserted at the time of submission. EPA cannot accommodate a late CBI claim to cover previously submitted information because efforts to protect the information are not administratively practicable since it may already be disclosed to the public. Although we do not foresee a need for persons to assert a claim of CBI based on the types of information requested in this form, if persons wish to assert a CBI claim we direct submitters to contact the [NPDES eReporting Help Desk](#) for further guidance. Please note that EPA may contact you after you submit this report for more information.

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2040-0004). Responses to this collection of information are mandatory in accordance with this permit and EPA NPDES regulations 40 CFR 122.41(l)(4)(i). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information are estimated to average 2 hours per outfall. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

EPA may make all the information submitted through this form (including all attachments) available to the public without further notice to you. Do not use this online form to submit personal information (e.g., non-business cell phone number or non-business email address), confidential business information (CBI), or if you intend to assert a CBI claim on any of the submitted information. Pursuant to 40 CFR 2.203(a), EPA is providing you with notice that all CBI claims must be asserted at the time of submission. EPA cannot accommodate a late CBI claim to cover previously submitted information because efforts to protect the information are not administratively practicable since it may already be disclosed to the public. Although we do not foresee a need for persons to assert a claim of CBI based on the types of information requested in this form, if persons wish to assert a CBI claim we direct submitters to contact the [NPDES eReporting Help Desk](#) for further guidance. Please note that EPA may contact you after you submit this report for more information.

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2040-0004). EPA may make all the information submitted through this form (including all attachments) available to the public without further notice to you. Do not use this online form to submit personal information (e.g., non-business cell phone number or non-business email address), confidential business information (CBI), or if you intend to assert a CBI claim on any of the submitted information. Pursuant to 40 CFR 2.203(a), EPA is providing you with notice that all CBI claims must be asserted at the time of submission. EPA cannot accommodate a late CBI claim to cover previously submitted information because efforts to protect the information are not administratively practicable since it may already be disclosed to the public. Although we do not foresee a need for persons to assert a claim of CBI based on the types of information requested in this form, if persons wish to assert a CBI claim we direct submitters to contact the [NPDES eReporting Help Desk](#) for further guidance. Please note that EPA may contact you after you submit this report for more information.

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2040-0004). Responses to this collection of information are mandatory in accordance with this permit and EPA NPDES regulations 40 CFR 122.41(l)(4)(i). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information are estimated to average 2 hours per outfall. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

EPA may make all the information submitted through this form (including all attachments) available to the public without further notice to you. Do not use this online form to submit personal information (e.g., non-business cell phone number or non-business email address), confidential business information (CBI), or if you intend to assert a CBI claim on any of the submitted information. Pursuant to 40 CFR 2.203(a), EPA is providing you with notice that all CBI claims must be asserted at the time of submission. EPA cannot accommodate a late CBI claim to cover previously submitted information because efforts to protect the information are not administratively practicable since it may already be disclosed to the public. Although we do not foresee a need for persons to assert a claim of CBI based on the types of information requested in this form, if persons wish to assert a CBI claim we direct submitters to contact the [NPDES eReporting Help Desk](#) for further guidance. Please note that EPA may contact you after you submit this report for more information.

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2040-0004). Responses to this collection of information are mandatory in accordance with this permit and EPA NPDES regulations 40 CFR 122.41(l)(4)(i). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information are estimated to average 2 hours per outfall. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

EPA may make all the information submitted through this form (including all attachments) available to the public without further notice to you. Do not use this online form to submit personal information (e.g., non-business cell phone number or non-business email address), confidential business information (CBI), or if you intend to assert a CBI claim on any of the submitted information. Pursuant to 40 CFR 2.203(a), EPA is providing you with notice that all CBI claims must be asserted at the time of submission. EPA cannot accommodate a late CBI claim to cover previously submitted information because efforts to protect the information are not administratively practicable since it may already be disclosed to the public. Although we do not foresee a need for persons to assert a claim of CBI based on the types of information requested in this form, if persons wish to assert a CBI claim we direct submitters to contact the [NPDES eReporting Help Desk](#) for further guidance. Please note that EPA may contact you after you submit this report for more information.

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2040-0004). Responses to this collection of information are mandatory in accordance with this permit and EPA NPDES regulations 40 CFR 122.41(l)(4)(i). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information are estimated to average 2 hours per outfall. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

Do not use this online form to submit personal information (e.g., non-business cell phone number or non-business email address), confidential business information (CBI), or if you intend to assert a CBI claim on any of the submitted information. Pursuant to 40 CFR 2.203(a), EPA is providing you with notice that all CBI claims must be asserted at the time of submission. EPA cannot accommodate a late CBI claim to cover previously submitted information because efforts to protect the information are not administratively practicable since it may already be disclosed to the public. Although we do not foresee a need for persons to assert a claim of CBI based on the types of information requested in this form, if persons wish to assert a CBI claim we direct submitters to contact the [NPDES eReporting Help Desk](#) for further guidance. Please note that EPA may contact you after you submit this report for more information.

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2040-0004). Responses to this collection of information are mandatory in accordance with this permit and EPA NPDES regulations 40 CFR 122.41(l)(4)(i). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information are estimated to average 2 hours per outfall. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

EPA may make all the information submitted through this form (including all attachments) available to the public without further notice to you. Do not use this online form to submit personal information (e.g., non-business cell phone number or non-business email address), confidential business information (CBI), or if you intend to assert a CBI claim on any of the submitted information. Pursuant to 40 CFR 2.203(a), EPA is providing you with notice that all CBI claims must be asserted at the time of submission. EPA cannot accommodate a late CBI claim to cover previously submitted information because efforts to protect the information are not administratively practicable since it may already be disclosed to the public. Although we do not foresee a need for persons to assert a claim of CBI based on the types of information requested in this form, if persons wish to assert a CBI claim we direct submitters to contact the [NPDES eReporting Help Desk](#) for further guidance. Please note that EPA may contact you after you submit this report for more information.

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2040-0004). Responses to this collection of information are mandatory in accordance with this permit and EPA NPDES regulations 40 CFR 122.41(l)(4)(i). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information are estimated to average 2 hours per outfall. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

Paragraph 68.a.(2) of the Consent Decree

Annual Inspection of the Drainage System

The annual stormwater drainage system CCTV inspection is scheduled to occur in Q3 2025. The 2024 annual stormwater drainage system CCTV inspection was completed in the 2nd quarter, 2024. The results of the CCTV inspection were analyzed by Pepco's consulting engineer in the 3rd quarter, 2024, and several items were identified for follow-up:

- 17 stormwater lines identified as needing cleaning.
- Stormwater Lines / Structures in need of repair:¹
 - I-73 to M-56
 - M-63 to M-63A
 - WQS-4 to M-54

The status of these corrective actions are as follows:

- Pepco has reviewed inspection footage with its O&M contractor and is expecting a proposal for the repair work to be received in early July. We expect to award the contract for repairs before the end of July, and for the work to be completed in fall 2025.

Based on the results of the CCTV inspection, several other areas were identified by Pepco's consulting engineer to be monitored for future cleaning and/or repair. Pepco will review these areas again as part of the 2025 CCTV inspection.

Site Drainage Drawing

There have been no changes to the site drainage map in Q2 2025.

¹ The Q4 2024 status report listed one additional pipe segment as requiring repair (I-29 to WQS-1). A further review of the 2024 CCTV footage confirmed that no immediate repairs are needed for this pipe segment. It will be evaluated again as part of the 2025 CCTV inspection.

Paragraph 68.a.(3) of the Consent Decree

Storm Drain Inlets Inspection Logs

The weekly storm drains inspection logs for April – June 2025 are attached.

Paragraph 68.a.(4) of the Consent Decree

Monthly Site Inspections

The site-wide inspection logs for April - June 2025 are attached. Benning operating areas continue to implement best management practices at the site including weekly inspection and maintenance of storm drain inlets and controls, removing equipment and materials that are no longer in use from the site to eliminate exposure to stormwater, covering or moving indoors equipment that has the potential to contribute to pollutant loading, street sweeping, site walk-downs to identify any needed infrastructure repairs, quarterly management walk-downs to verify O&M controls, and supervision of the contractors working at the site to ensure they practice good housekeeping. Pepco also actively reviews the findings from weekly and monthly stormwater inspections to follow up on any actions needed.

The storage shed constructed in accordance with Paragraph 53 of the Consent Decree continues to operate as designed for temporary storage of off-line and removed from service transformers and other electrical equipment while awaiting recycling or disposal.

The site continues to perform inspections after rain events greater than 0.5 inches and follows up with corrective actions as may be needed based on those inspections.

The following projects completed in the 2nd Quarter 2025 reduced the potential contribution of metals to stormwater discharged from the site:

- Continued rotation and replacement of witches' hats and green booms to control TSS and metals in stormwater entering the storm drain system.
- Continued monitoring and maintenance of Stormexx and Abtech units to control TSS and metals in stormwater entering the storm drain system.
- Continued monitoring and maintenance of Jellyfish filter units. Washing of the filter cartridge "tentacles" was performed in April 2025. Inlet bays in all Jellyfish and Stormfilter units were cleaned as well. In addition to this, Pepco engaged a contractor to replace filter cartridges not meeting performance criteria during the 2024 performance testing in Q2 2025.

Paragraph 68.a.(5) of the Consent Decree
Status of Stormwater Treatment System

Outfall 013

Performance Testing

The Fall 2024 Performance Testing Report was submitted to EPA in Q1 2025 and was included with the Q1 2025 Consent Decree Report submittal. PEPCO completed performance test sampling for Spring 2025 in May 2025. The Spring 2025 Performance Testing Report will be submitted to EPA in Q3 and will be included in the Q3 Consent Decree Report submittal.

Maintenance

In accordance with the findings from the Fall 2024 performance testing report, PEPCO performed the following actions in the Second Quarter of 2025:

- Pepco continued coordination with the Stormwater Treatment System O&M contractor to discuss maintenance of the Jellyfish and Stormfilter units that did not meet the performance criteria during the Fall 2024 performance testing. These units were inspected in Q2 2025, as well as in Q1 2025 and Q3 and Q4 2024, with no observed structural, water quality, or other functional issues.
- Quarterly maintenance was completed over the week of April 24th, 2025. Pepco's O&M contractor cleaned inlet chambers as well as Jellyfish cartridges as part of this maintenance activity. Reports provided by Pepco's O&M Contractor showed no discernible problems during either inspections or cleaning activities. Pepco has arranged to perform cleaning again by the end of September 2025.
- Pepco engaged a contractor to replace all filter cartridges not meeting performance criteria during the 2024 performance testing in April 2025; the work is now expected to be completed by the end of 2025.

Outfall 101

Results from the most recent quarterly sampling events show that the Outfall 101 stormwater treatment system continues to effectively treat the stormwater to below the Outfall 101 permit limits. A summary of the results is presented below:

	Limit (starting 6/1/2022)										Benchmarks				
	PH	TSS	O&G	Iron	Copper	Zinc	Lead	PCB1242*	PCB1254*	PCB1260*	Nickel	Cadmium	TN	TP	Sample

Paragraph 68.a.(6) of the Consent Decree

Stormwater Management Training

General SWPPP training was delivered to employees working at Benning during the period from April – June 2025. Topics covered by this training included:

- SWPPP requirement history
 - 1980 Urban Runoff Program.
 - 1990 development requiring SWPPP plans.
 - SWPPP required for sites covered by a NPDES permit.
 - Discussion of DC ordinances, prohibited discharges, and prohibition of off-site discharges.
- Purpose of the SWPPP Plan:
 - Identify SW pollution sources.
 - Identify existing and proposed BMP measures.
 - Present a plan to implement proposed measures.
 - Describe procedures for plan evaluation.
- Breakdown of common SW pollution sources
- Discussion of “hotspots” at Benning Road
 - Transformer shop, salvage yard, former Station A Fuel Tank area and Generating Station Area.
- General requirements for all sites:
 - Never deliberately discharge or allow discharge of any materials, hazardous or non-hazardous, to a drain.
 - Never store or accumulate materials in a manner that results in exposure to rainfall and resultant runoff.
 - Keep drains free of debris and ensure that booms/inlet protection devices are in place.
- Special site requirements
 - Liquid storage areas
 - All tanks/containers used to store materials shall be constructed of compatible materials.
 - Containers must be maintained under appropriate storage conditions relative to the stored material (temperature, pressure, etc.).
 - Non-liquid storage areas
 - Storage areas for non-liquid materials that are subject to runoff or leaching shall have drainage protection or other control features to prevent or minimize discharge of contaminated runoff.
 - Truck loading/unloading areas.
 - Liquid un-loading areas must have spill containment measures in place.

- These areas must also have spill containment materials nearby for quick and easy access.
 - Personnel must always be present during loading/unloading activities to ensure that any leaks are immediately addressed.
 - Secondary containment areas
 - Discharges from secondary containment areas (i.e. drainage after rainfall) shall be visually monitored and inspected for the presence of oil or other chemicals prior to release.
 - All discharges from secondary containment areas shall be recorded in a logbook, including information on frequency and estimated volume of discharge. These records are kept for at least three years.
 - Preventative Maintenance and Housekeeping
 - There shall be no uncontrolled dumping or abandonment of materials. All materials removed from stock or returned to service centers from use in the field, shall be placed in designated areas that are managed in a manner that prevents potential contamination of storm water runoff.
 - All materials removed from stock or returned to service centers from use in the field, shall be placed in designated areas that are managed in a manner that prevents potential contamination of storm water runoff.
 - All material storage areas for which you have responsibility should be inspected routinely at the frequency specified in your area procedures or site plan.
 - Inspections should include examination for conditions of direct contact of storm water with raw materials or products and examination for leaks, corrosion, support/foundation failure, or other forms of deterioration or non-containment.
 - Notify your Environmental Coordinator of any new outdoor material storage areas created to ensure that the criteria under the SWP3 are met and if necessary, the area is identified in the SWP3.
 - Ensure that Contractors follow these practices to prevent storm water pollution during the conduct of Pepco's work.
- Preventative measures to reduce pollution
 - Overview of structural vs. procedural BMPs.
- Structural BMPs
 - Engineered structures or design features that control and/or prevent pollution.
 - Examples: secondary containment structures, retention basins, graded areas, curbs/gutters which channel SW away from material storage areas.
 - Examples at Benning Road: Covered storage areas (i.e. BSC Bldg. 56 storage shed for out-of-service transformers), SWM systems at the transformer shop, salvage yard, and former Station A fuel tank area and generation station areas.
 - More examples of structural BMPs: collection basins, drip pans, erosion prevention and sediment control, infiltration trenches, grass swales (Low-Impact Development project at Benning), oil retention booms, safety and security features (i.e. bollards, warning signs, fences), and stormwater retention installations (at Benning, two are located at the former Station A generating station and cooling towers).

- Procedural BMPs
 - Operational measures or work practices to prevent and/or control pollution.
 - An inspection report and schedule will be used to monitor the stormwater treatment and storm drain systems.
 - Some examples of Procedural BMPs are:
 - Good Housekeeping - clean orderly work environment, neat and safe accessible storage areas.
 - Observation and Reporting - regular inspections to detect problems.
 - Production Methods - preventive maintenance on equipment, use of less toxic materials.
- Participants view and examine a sample Benning Service Center SWPPP inspection form.
- General information
 - The SWP3 for the Benning Service Center and Chalk Point and Dickerson Switchyards were developed in accordance with the requirements outlined in the respective site NPDES permit and EPA guidance manuals.
 - Development and revisions to the SWP3 is the responsibility of each site's Pollution Prevention Team.
 - One of the responsibilities of the Pollution Prevention Team is to review, evaluate and update the SWP3 annually.
 - Site storm water runoff is conveyed through drains that ultimately discharge to the Anacostia River and city storm sewers at various outfalls at Benning, the Patuxent River at Chalk Point, and the Potomac River at Dickerson, respectively.
 - Drawings showing the site drainage areas and tables listing discharge points are provided in each SWP3.
- Location of the SWPPP on-site
 - Copies of the SWPPP for the Benning Service Center and the Chalk Point and Dickerson Switchyards are available from your Environmental Coordinator.
 - Plans are made available to government agency inspectors or any company auditors upon request.
- Course Summary
 - Federal and state laws prohibit discharges of pollutants to storm drains.
 - Pollutants include but are not limited to the following:
 - Oil and petroleum products.
 - Engine coolant, hydraulic fluids.
 - Paint waste, detergents and other cleaning products or cleaning waste (such as vehicle wash water, floor cleaning waste, etc.).
 - Concrete cutting slurry or runoff from other "industrial" activities that may carry suspended solids or other pollutants to the storm drain.
 - Construction debris.
 - Yard waste (such as grass clippings).
 - Pepco has developed SWP3s for Benning Service Center and Chalk Point and Dickerson switchyards.
 - This training course and the SWP3 identify potential sources of storm water pollution at the site and document preventive measures (Operational and Structural

BMPs) and prohibitions that must be followed, where applicable, by all employees and contractors.

- The SWP3 may be obtained from your Environmental Coordinator.
- Visually inspect secondary containment areas for evidence of oil or chemicals prior to opening valves to release water. All releases should be logged, and the log must be maintained for three years.
- Practice Good housekeeping.
- Exercise care when fueling vehicles.
- Do not dump, abandon or leave materials outside of designated controlled storage areas. Such action may be in violation of the regulations and the SWP3. It also subjects the employee to potential criminal liability and/or internal disciplinary actions.
- Do not allow contractors to violate the Company's storm water pollution prevention procedures on site or while doing company work off-site.
- Contact your Environmental Coordinator, Site Compliance Officer, or Environmental Management Services if you have questions or need assistance.

Participants are tested on the training content and must score 80% or higher to successfully complete the training.

The attached list includes the names of the employees working at Benning who received the Stormwater Management Training during the period from April - June 2025.

Paragraph 68.a.(7) of the Consent Decree

Stormwater Pollution Prevention Plan

The Stormwater Pollution Prevention Plan (SWPPP) annual review for 2025 is scheduled to occur in Q4 2025. The previous SWPPP annual review was completed by the SWPPP team in 2024, and the SWPPPs were updated following that review. Because a portion of the property was sold to a third party in 2023 for redevelopment, two separate SWPPPs have been prepared. One SWPPP covers the portion of the property that was sold (but that remains subject to the facility's NPDES permit), referred to as Benning Service Center – West. A separate SWPPP covers the property retained by Pepco, referred to as Benning Service Center -- East. Copies of the two updated SWPPPs were provided in the Q3 2024 status report and have not been subsequently revised.

Paragraph 68.a.(8) of the Consent Decree

Change in Management Responsibilities

Pepco's former Manager of Environmental Management, Jamie Hill, left the company in Q2 2025. Ryan Robichaud is serving as Interim Manager of Environmental Management.

Paragraph 68.a.(9) of the Consent Decree

Status of Completion of the Transformer Storage Shed

The construction of the Transformer Storage Shed was completed by December 31, 2016, and the facility was placed in operation.

Paragraph 68.a.(10) of the Consent Decree

Status of Stormwater Retention Project

As reported in the 2018 4th quarter status report, Pepco determined that the Stormwater Retention Project described in Section VIII of the Consent Decree was not technically feasible and paid the stipulated penalty of \$500,000 to EPA in August 2018 for not implementing this project.

Paragraph 68.a.(11) of the Consent Decree

Description of Non-Compliance(s)

There were no non-compliance events for the 2nd Quarter 2025.
